

JOSHUA L GESCHWENDT

FULL STACK, BLEEDING EDGE, WEB DEVELOPER

EXPERIENCE

Springthrough

Developer • November 2014 to Present

Collaborate daily with designers, developers, and project managers to build quality experiences over a variety of platforms and technologies for our clients and their users. Solutions range from enterprise content management systems to single page web applications, developed with quality tested code backed with continuous integration.

Freelancer

Designer & Developer • May 2014 to Present

Actively responsible for developing and maintaining several small to enterprise level business solutions through iterative and agile development cycles. Throughout these cycles a clear focus is kept on a maintainable DRY performance based code and consistent package management.

Michigan State University

Contract Developer • May 2013 to November 2014

Restructured, redesigned and developed a suite of websites for the university including the global search engine and interactive map. Several of these websites received a complete rewrite, resulting in a new university search API. The API now serves as a standard solution for other departments within the university and continues to be actively developed.

Whirlpool Corporation

iOS Developer Intern • September 2013 to December 2013

Developed a native iOS application that gave users the ability to configure custom settings for an appliance based on the location of their device. This served as the proof of concept for several of Whirlpool's new smart appliance line.

EDUCATION

Bachelor of Science, Computer Science

Michigan State University

College of Engineering

East Lansing, MI

May 2013
